INDEX TO AUTHORS

A

Albanese, Anthony A. An electrolytic method for the determination of the basic amino acids in proteins, 467

Allison, Franklin E. See *Hoover and Allison*, 181

Almquist, H. J., Mecchi, E., Stokstad, E. L. R., and Manning, P. D. V. Identification of the rice factor. The carbohydrate component, 465

—, **Stokstad, E. L. R., Mecchi, E., and Manning, P. D. V.** Identification of the rice factor, 213

Althausen, T. L. See *Eiler, Stockholm, and Althausen*, 283

Anderson, H. D., and Elvehjem, C. A. Variations in the blood calcium and phosphorus with the age of the dog, 217

Arnow, L. Earle, and Opsahl, Jeanette C. Racemization of glutamic acid with heat, 649

Austoni, Mario E., and Greenberg, David M. Studies in iron metabolism with the aid of its artificial radioactive isotope. The absorption, excretion, and distribution of iron in the rat on normal and iron-deficient diets, 27

—, **Rabinovitch, Alexander, and Greenberg, David M.** The iron content of the tissues of normal, anemic, and iron-enriched rats freed from blood by viviperfusion, 17

Axelrod, A. E., Sober, H. A., and Elvehjem, C. A. The *d*-amino acid oxidase content of rat tissues in riboflavin deficiency, 749

B

Ball, Eric G. A test of 2-keto-*l*-gulonic acid for antiscorbutic properties, 177

— and **Meyerhof, Bettina.** On the occurrence of iron-porphyrin compounds and succinic dehydrogenase in marine organisms possessing the copper blood pigment hemocyanin, 483

Barker, H. A. See *Hassid and Barker*, 163

Barnes, S. T. See *Mueller, Kemmerer, Cox, and Barnes*, 573

Bergmann, Max. See *Hofmann and Bergmann*, 225

—. See *Stein and Bergmann*, 627

Bernheim, Frederick, and Bernheim, Mary L. C. Action of 4-amino-2-methylnaphthol on the oxidation of certain sulfhydryl groups, 457

Bernheim, Mary L. C. See *Bernheim and Bernheim*, 457

Bischoff, Fritz. The action of cysteine or cyanide upon gonadotropic extracts, 641

Blatherwick, N. R., Bradshaw, Phoebe J., Ewing, Mary E., Larson, Hardy W., and Sawyer, Susan D. The metabolism of *d*-sorbitol, 549

Bloch, Konrad, and Schoenheimer, Rudolf. The biological origin of the amidine group in creatine, 785

Block, Richard J., Jervis, George A., Bolling, Diana, and **Webb, Merrill.** Chemical and metabolic studies on phenylalanine. III. The amino acid content of tissue proteins of normal and phenylpyruvic oligophrenic individuals. A note on the estimation of phenylalanine, 567

—. See *Jervis, Block, Bolling, and Kanze,* 105

Bolling, Diana. See *Block, Jervis, Bolling, and Webb,* 567

—. See *Jervis, Block, Bolling, and Kanze,* 105

Borsook, Henry, and **Dubnoff, Jacob W.** Creatine formation in liver and in kidney, 635

Bradshaw, Phoebe J. See *Blatherwick, Bradshaw, Ewing, Larson, and Sawyer,* 549

Briggs, David R. The metaphosphoric acid-protein reaction, 261

Brown, George Bosworth. See *du Vigneaud, Chandler, Cohn, and Brown,* 787

Brown, J. B. See *Shinowara and Brown,* 331

Butler, Allan M. See *Talbot, Wolfe, MacLachlan, Karush, and Butler,* 319

C

Cawley, John D. See *Gray and Cawley,* 397

Chaikoff, I. L. See *Entenman, Changus, Gibbs, and Chaikoff,* 59

—. See *Entenman, Lorenz, and Chaikoff,* 495

Chandler, Joseph P. See *du Vigneaud, Chandler, Cohn, and Brown,* 787

Changus, G. W. See *Entenman, Changus, Gibbs, and Chaikoff,* 59

Chargaff, Erwin, and **Keston, Albert S.** The metabolism of aminoethylphosphoric acid, followed by means of the radioactive phosphorus isotope, 515

Chargaff, Erwin, Olson, Kenneth B., and **Partington, Philip F.** The formation of phosphatides in the organism under normal and pathological conditions, 505

Christman, Clarence C. See *Ovakimian, Christman, Kuna, and Levene,* 151

Cohn, Mildred. See *du Vigneaud, Chandler, Cohn, and Brown,* 787

Cox, Warren M., Jr. See *Mueller, Kemmerer, Cox, and Barnes,* 573

Craig, Lyman C., and **Jacobs, Walter A.** The veratrine alkaloids. VII. On decevinic acid, 123

D

Darrow, Daniel C. See *Yannet and Darrow,* 721

Doisy, Edward A. See *Huffman, MacCorquodale, Thayer, Doisy, Smith, and Smith,* 591

Dubnoff, Jacob W. See *Borsook and Dubnoff,* 635

E

Eichelberger, Lillian, Fetcher, E. S., Jr., Geiling, E. M. K., and **Vos, B. J., Jr.** The composition of dolphin milk, 171

Eiler, John J., Stockholm, M., and **Althausen, T. L.** The effect of the rate of absorption of glucose on the phosphates in the intestinal mucosa, 283

Elam, Daniel W. See *Norris and Elam,* 443

Elvehjem, C. A. See *Anderson and Elvehjem,* 217

—. See *Axelrod, Sober, and Elvehjem,* 749

—. See *Hove, Elvehjem, and Hart,* 425

—. See *Sober, Lipton, and Elvehjem,* 605

Entenman, C., Changus, G. W., Gibbs, G. E., and **Chaikoff, I. L.** The response of lipid metabolism to alterations in nutritional state. I. The effects of fasting and chronic undernutrition upon the postabsorptive level of the blood lipids, 59

—, **Lorenz, F. W.,** and **Chaikoff, I. L.** The endocrine control of lipid metabolism in the bird. III. The effects of crystalline sex hormones on the blood lipids of the bird, 495

Ewing, Mary E. See *Blatherwick, Bradshaw, Ewing, Larson, and Sawyer,* 549

F

Fetcher, E. S., Jr. See *Eichelberger, Fetcher, Geiling, and Vos,* 171

Field, Henry, Jr. See *Melnick and Field,* 1

Franke, Kurt W. See *Painter and Franke,* 557

G

Gavin, Gertrude. See *Longenecker, Gavin, and McHenry,* 693

—. See *McHenry and Gavin,* 683

Geiling, E. M. K. See *Eichelberger, Fetcher, Geiling, and Vos,* 171

Gibbs, G. E. See *Entenman, Changus, Gibbs, and Chaikoff,* 59

Glick, David. Properties of tropine esterase, 617

Golumbic, Calvin, and **Mattill, H. A.** The oxidation of vitamin E, 535

Grafflin, Allan L. See *Marble, Grafflin, and Smith,* 253

Gray, E. LeB., and **Cawley, John D.** The influence of structure on the elimination maximum. I. The structure of vitamin A_2, 397

Greenberg, David M. See *Austoni and Greenberg,* 27

Greenberg, David M. See *Austoni, Rabinovitch, and Greenberg,* 17

Greenblatt, I. J., and **Pecker, A.** The effect of ascorbic acid on iminazole rings and allied substances *in vivo,* 341

Grollman, Arthur, Williams, J. R., Jr., and **Harrison, Tinsley R.** The preparation of renal extracts capable of reducing the blood pressure of animals with experimental renal hypertension, 115

H

Hahn, P. F. See *Miller and Hahn,* 585

Harrison, Tinsley R. See *Grollman, Williams, and Harrison,* 115

Hart, E. B. See *Hove, Elvehjem, and Hart,* 425

Hassid, W. Z., and **Barker, H. A.** The structure of dextran synthesized from sucrose by *Betacoccus arabinosaceus,* Orla-Jensen, 163

Hauser, Charles R. See *Peck and Hauser,* 403

Hellerman, Leslie. See *Richards and Hellerman,* 237

Hendricks, Jeannette B. See *Morgan, Shimotori, and Hendricks,* 761

Hodge, Harold Carpenter. See *Manly, Hodge, and Manly,* 293

—. See *Volker, Hodge, Wilson, and Van Voorhis,* 543

Hofmann, Klaus, and **Bergmann, Max.** The specificity of carboxypeptidase, 225

Hoover, Sam R., and **Allison, Franklin E.** The growth metabolism of *Rhizobium,* with evidence on the interrelations between respiration and synthesis, 181

Hove, E., Elvehjem, C. A., and **Hart, E. B.** The effect of zinc on alkaline phosphatases, 425

Huffman, Max N., MacCorquodale, D. W., Thayer, Sidney A., Doisy, Edward A., Smith, G. V., and Smith, O. W. The isolation of α-dihydrotheelin from human pregnancy urine, 591

Hyde, Elizabeth. Glycine and histidine feeding and creatine, creatinine, and inorganic phosphorus excretion in man, 95

J

Jacobs, Walter A. See *Craig and Jacobs*, 123

Jervis, George A., Block, Richard J., Bolling, Diana, and Kanze, Edna. Chemical and metabolic studies on phenylalanine. II. The phenylalanine content of the blood and spinal fluid in phenylpyruvic oligophrenia, 105

—. See *Block, Jervis, Bolling, and Webb*, 567

Johnson, J. M. The racemization of glutamic acid, 459

Jukes, Thomas H. Prevention of perosis by choline, 789

K

Kanze, Edna. See *Jervis, Block, Bolling, and Kanze*, 105

Kapp, Eleanor M. Microestimation of uronic acids, 143

Karush, F. See *Talbot, Wolfe, MacLachlan, Karush, and Butler*, 319

Kemmerer, Kenneth S. See *Mueller, Kemmerer, Cox, and Barnes*, 573

Keston, Albert S. See *Chargaff and Keston*, 515

—. See *Ratner, Rittenberg, Keston, and Schoenheimer*, 665

Klein, J. R. The oxidation of *l*(−)-aspartic and *l*(+)-glutamic acids by *Hemophilus parainfluenzae*. Note on the preparation of pyridine nucleotides from bakers' yeast by the method of Warburg and Christian, 43

Kuna, Martin. See *Ovakimian, Christman, Kuna, and Levene*, 151

L

Lackman, David B. See *Sevag, Smolens, and Lackman*, 523

Larson, Hardy W. See *Blatherwick, Bradshaw, Ewing, Larson, and Sawyer*, 549

Levene, P. A. See *Ovakimian, Christman, Kuna, and Levene*, 151

Lipmann, Fritz. A phosphorylated oxidation product of pyruvic acid, 463

Lipton, M. A. See *Sober, Lipton, and Elvehjem*, 605

Longenecker, Herbert E., Gavin, Gertrude, and McHenry, E. W. Fatty acids synthesized by the action of thiamine, 693

Lorenz, F. W. See *Entenman, Lorenz, and Chaikoff*, 495

M

MacCorquodale, D. W. See *Huffman, MacCorquodale, Thayer, Doisy, Smith, and Smith*, 591

MacLachlan, E. A. See *Talbot, Wolfe, MacLachlan, Karush, and Butler*, 319

Man, Evelyn B. See *Riggs and Man*, 193

Mangun, George H. See *Muntwyler, Mellors, Mautz, and Mangun*, 367, 389

Manly, Marian LeFevre. See *Manly, Hodge, and Manly*, 293

Manly, Richard S., Hodge, Harold Carpenter, and Manly, Marian LeFevre. The relation of the

phosphorus turnover of the blood to the mineral metabolism of the calcified tissues as shown by radioactive phosphorus, 293

Manning, P. D. V. See *Almquist, Mecchi, Stokstad, and Manning,* 465

—. See *Almquist, Stokstad, Mecchi, and Manning,* 213

Marble, Alexander, Grafflin, Allan L., and **Smith, Rachel M.** Glycogen, fat, and water content of guinea pig liver, 253

Mattill, H. A. See *Golumbic and Mattill,* 535

Mautz, Frederick R. See *Muntwyler, Mellors, and Mautz,* 345

—. See *Muntwyler, Mellors, Mautz, and Mangun,* 367, 389

McHenry, E. W., and **Gavin, Gertrude.** The effects of liver and pancreas extracts upon fat synthesis and metabolism, 683

—. See *Longenecker, Gavin, and McHenry,* 693

Mecchi, E. See *Almquist, Mecchi, Stokstad, and Manning,* 465

—. See *Almquist, Stokstad, Mecchi, and Manning,* 213

Mellors, Robert C. See *Muntwyler, Mellors, and Mautz,* 345

—. See *Muntwyler, Mellors, Mautz, and Mangun,* 367, 389

Melnick, Daniel, and **Field, Henry, Jr.** Determination of nicotinic acid in biological materials by means of photoelectric colorimetry, 1

Meyer, Curtis E., and **Smith, Arthur H.** The influence of the type of carbohydrate ingested upon citric acid production, 739

Meyerhof, Bettina. See *Ball and Meyerhof,* 483

Miller, Leon L., and **Hahn, P. F.** The appearance of radioactive iron as hemoglobin in the red cell. The significance of "easily split" iron, 585

Morgan, Agnes Fay, Shimotori, Nobuko, and **Hendricks, Jeannette B.** Progress of hypervitaminoses D_2 and D_3 and recovery in rats, as affected by dietary calcium and phosphorus and vitamin A, 761

Mueller, Arthur J., Kemmerer, Kenneth S., Cox, Warren M., Jr., and **Barnes, S. T.** The effect of casein and a casein digest on growth and serum protein regeneration, 573

Muntwyler, Edward, Mellors, Robert C., and **Mautz, Frederick R.** Electrolyte and water equilibria in the dog. I. Equilibria in the blood in adrenal insufficiency, 345

—, —, —, and **Mangun, George H.** Electrolyte and water equilibria in the dog. II. Electrolyte and water exchange between skeletal muscle and blood in adrenal insufficiency, 367

—, —, —, and —. III. Electrolyte and water exchange between tendon and blood, 389

N

Norris, Earl R., and **Elam, Daniel W.** Preparation and properties of crystalline salmon pepsin, 443

North, H. B. See *Pfiffner and North,* 781

O

Olson, Kenneth B. See *Chargaff, Olson, and Partington,* 505

Opsahl, Jeanette C. See *Arnow and Opsahl,* 649

Ovakimian, G., Christman, Clarence C., Kuna, Martin, and **Levene, P. A.** The reaction of the esters

of *dl*-leucine and of *l*-leucine on the Raney catalyst, 151
Owen, Charles A. See *Smith and Owen*, 783

P

Painter, Edgar Page, and **Franke, Kurt W.** The decomposition of seleniferous proteins in alkaline solutions, 557
Partington, Philip F. See *Chargaff, Olson, and Partington*, 505
Peck, Robert L., and **Hauser, Charles R.** Chemical studies of certain pathogenic fungi. III. Further studies on the lipids of *Blastomyces dermatiditis* and *Monilia albicans*, 403
Pecker, A. See *Greenblatt and Pecker*, 341
Pfiffner, J. J., and **North, H. B.** Dimethyl sulfone; a constituent of the adrenal gland, 781
Potter, V. R. Studies on the mechanism of hydrogen transport in animal tissues. I. Triose phosphate oxidation in the presence of malonate, 417

R

Rabinovitch, Alexander. See *Austoni, Rabinovitch, and Greenberg*, 17
Rane, Leo, and **Subbarow, Yellapragada.** Choline, pantothenic acid, and nicotinic acid as essential growth factors for pneumococcus, 455
Ratner, S., Rittenberg, D., Keston, Albert S., and **Schoenheimer, Rudolf.** Studies in protein metabolism. XIV. The chemical interaction of dietary glycine and body proteins in rats, 665
—, **Schoenheimer, Rudolf,** and **Rittenberg, D.** Studies in protein metabolism. XIII. The metabolism and inversion of *d*(+)-leucine studied with two isotopes, 653
Ray, Thomas W. The determination of manganese in organic material containing large amounts of calcium and chlorides. The determination of manganese in the mouse and in milk, 677
Richards, Marianna M., and **Hellerman, Leslie.** Activation of enzymes. VI. Purified liver arginase: reversible inactivation and reactivation, 237
Riggs, D. S., and **Man, Evelyn B.** A permanganate acid ashing micromethod for iodine determinations. I. Values in blood of normal subjects, 193
Rittenberg, D. See *Ratner, Rittenberg, Keston, and Schoenheimer*, 665
—. See *Ratner, Schoenheimer, and Rittenberg*, 653
Rosenblum, Louis A., and **Jolliffe, Norman.** Application to urine of Bandier and Hald's method for determination of nicotinic acid, 137

S

Sawyer, Susan D. See *Blatherwick, Bradshaw, Ewing, Larson, and Sawyer*, 549
Schoenheimer, Rudolf. See *Bloch and Schoenheimer*, 785
—. See *Ratner, Rittenberg, Keston, and Schoenheimer*, 665
—. See *Ratner, Schoenheimer, and Rittenberg*, 653
Sevag, M. G., Smolens, J., and **Lackman, David B.** The nucleic acid content and distribution in *Streptococcus pyogenes*, 523
Seymour, W. B. The preparation of cellophane membranes of graded permeability, 701

Shimotori, Nobuko. See *Morgan, Shimotori, and Hendricks,* 761

Shinowara, G. Y., and **Brown, J. B.** Studies on the chemistry of the fatty acids. VI. The application of crystallization methods to the isolation of arachidonic acid, with a comparison of the properties of this acid prepared by crystallization and by debromination. Observations on the structure of arachidonic acid, 331

Sinclair, Robert Gordon. The exclusion of elaidic acid from the phospholipids of the testes and its uptake by other organs of the rat, 89

—. The rate of turnover of lecithins and cephalins in the liver, 83

—. The rate of turnover of phospholipids in kidney and liver, 71

Smith, Arthur H. See *Meyer and Smith,* 739

Smith, G. V. See *Huffman, MacCorquodale, Thayer, Doisy, Smith, and Smith,* 591

Yannet, Herman, and **Darrow, Daniel C.** The effect of depletion of extracellular electrolytes on the chemical composition of skeletal muscle, liver, and cardiac muscle, 721

INDEX TO SUBJECTS

A

Acetic acid: Iodo-, growth effect, *Stevenson and White,* 709
—, sulfur metabolism, influence, *Stevenson and White,* 709
Adrenal(s): Dimethyl sulfone, *Pfiffner and North,* 781
Insufficiency, blood electrolyte and water equilibria, *Muntwyler, Mellors, and Mautz,* 345
—, muscle, skeletal, and blood, electrolyte and water exchange, *Muntwyler, Mellors, Mautz, and Mangun,* 367
Age: Blood calcium, effect, *Anderson and Elvehjem,* 217
— phosphorus, effect, *Anderson and Elvehjem,* 217
Alkaloid(s): Veratrine, *Craig and Jacobs,* 123
Amidine group: Creatine, origin, biological, *Bloch and Schoenheimer,* 785
Amino acid(s): Basic, proteins, determination, electrolytic, *Albanese,* 467
d-, oxidase, tissue, riboflavin deficiency effect, *Axelrod, Sober, and Elvehjem,* 749
Tissue proteins, phenylpyruvic oligophrenia, *Block, Jervis, Bolling, and Webb,* 567
Aminoethylphosphoric acid: Metabolism, radioactive phosphorus isotope as indicator, *Chargaff and Keston,* 515
Amino-2-methylnaphthol: 4-, sulfhydryl groups, oxidation, effect, *Bernheim and Bernheim,* 457
Anemia: Tissue iron, *Austoni, Rabinovitch, and Greenberg,* 17
Arachidonic acid: Chemical constitution, *Shinowara and Brown,* 331
Isolation, *Shinowara and Brown,* 331
Properties, crystallization and debromination preparation, comparison, *Shinowara and Brown,* 331
Arginase: Liver, *Richards and Hellerman,* 237
Ascorbic acid: Iminazole rings *in vivo* effect, *Greenblatt and Pecker,* 341
Aspartic acid: *l*(−)-, oxidation, *Hemophilus parainfluenzae, Klein,* 43

B

Betacoccus arabinosaceus: Dextran synthesis from sucrose and chemical constitution, *Hassid and Barker,* 163
Blastomyces dermatiditis: Lipids, *Peck and Hauser,* 403
Blood: Calcium, age effect, *Anderson and Elvehjem,* 217
Diastase, health and diabetes, *Somogyi,* 315
Electrolyte and water exchange, *Muntwyler, Mellors, Mautz, and Mangun,* 389
— equilibrium, adrenal insufficiency, *Muntwyler, Mellors, and Mautz,* 345
Iodine, *Riggs and Man,* 193

Blood—*continued:*
Iodine, determination, micro-, permanganate acid ashing method, *Riggs and Man,* 193
Lipids, fasting and undernutrition effect, *Entenman, Changus, Gibbs, and Chaikoff,* 59
—, sex hormones, crystalline, effect, *Entenman, Lorenz, and Chaikoff,* 495
Muscle, skeletal, and, electrolyte and water exchange, adrenal insufficiency, *Muntwyler, Mellors, Mautz, and Mangun,* 367
Phenylalanine, phenylpyruvic oligophrenia, *Jervis, Block, Bolling, and Kanze,* 105
Phosphorus, age effect, *Anderson and Elvehjem,* 217
— turnover, tissue, calcified, mineral metabolism relation, radioactive phosphorus as indicator, *Manly, Hodge, and Manly,* 293
Water equilibrium, adrenal insufficiency, *Muntwyler, Mellors, and Mautz,* 345
Blood cell: Red, hemoglobin, iron, radioactive, *Miller and Hahn,* 585
Blood pressure: Reduction, renal hypertension, kidney extracts, effect, *Grollman, Williams, and Harrison,* 115
Blood serum: Protein, casein and casein digest effect, *Mueller, Kemmerer, Cox, and Barnes,* 573
Bone: Fluoride adsorption, radioactive isotope in study, *Volker, Hodge, Wilson, and Van Voorhis,* 543

C

Calcium: Blood, age effect, *Anderson and Elvehjem,* 217
Calcium—*continued:*
Hypervitaminoses D_2 and D_3, ingestion effect, *Morgan, Shimotori, and Hendricks,* 761
Carbohydrate(s): Citric acid production, effect, *Meyer and Smith,* 739
Complex, rice factor, *Almquist, Mecchi, Stokstad, and Manning,* 465
Carboxypeptidase: Specificity, *Hofmann and Bergmann,* 225
Cardiac: *See* Heart
Carotene: Fat and, oxidation, carotene oxidase effect, *Sumner and Sumner,* 531
Oxidase, carotene and fat oxidation, effect, *Sumner and Sumner,* 531
Casein: Blood serum regeneration, effect, *Mueller, Kemmerer, Cox, and Barnes,* 573
Digest, blood serum protein regeneration, effect, *Mueller, Kemmerer, Cox, and Barnes,* 573
—, growth effect, *Mueller, Kemmerer, Cox, and Barnes,* 573
Growth effect, *Mueller, Kemmerer, Cox, and Barnes,* 573
Cellophane: Membranes, preparation, *Seymour,* 701
Cephalin(s): Liver, turnover, *Sinclair,* 83
Cerebrospinal fluid: Phenylalanine, phenylpyruvic oligophrenia, *Jervis, Block, Bolling, and Kanze,* 105
Chemical constitution: Elimination maximum, influence, *Gray and Cawley,* 397
Chick: Growth factor. *See also* Rice factor
Choline: Methionine methyl group transfer to, *du Vigneaud, Chandler, Cohn, and Brown,* 787

Choline—*continued:*
Perosis, prevention, *Jukes*, 789
Pneumococcus growth factor, *Rane and Subbarow*, 455
Citric acid: Metabolism, thiamine relation, *Sober, Lipton, and Elvehjem*, 605
Production, carbohydrate effect, *Meyer and Smith*, 739
Creatine: Amidine group, origin, biological, *Bloch and Schoenheimer*, 785
Excretion, glycine and histidine ingestion effect, *Hyde*, 95
Kidney, formation, *Borsook and Dubnoff*, 635
Liver, formation, *Borsook and Dubnoff*, 635
Methionine methyl group transfer to, *du Vigneaud, Chandler, Cohn, and Brown*, 787
Creatinine: Excretion, glycine and histidine ingestion effect, *Hyde*, 95
Cullen, Glenn Ernest: Obituary, *Van Slyke*, preceding p. 467
Cyanide: Gonadotropic extracts, effect, *Bischoff*, 641
Cysteine: Gonadotropic extracts, effect, *Bischoff*, 641

D

Decevinic acid: *Craig and Jacobs*, 123
Dehydrogenase: Succinic, marine organisms, *Ball and Meyerhof*, 483
Dentin: Fluoride adsorption, radioactive isotope in study, *Volker, Hodge, Wilson, and Van Voorhis*, 543
Dextran: Chemical constitution, synthesis from sucrose, *Betacoccus arabinosaceus, Hassid and Barker*, 163
Diabetes: Blood diastase, *Somogyi*, 315
Diastase: Blood, health and diabetes, *Somogyi*, 315
Saccharogenic action, *Somogyi*, 301
Dihydrotheelin: α-, urine, pregnancy, isolation, *Huffman, MacCorquodale, Thayer, Doisy, Smith, and Smith*, 591
Dimethyl sulfone: Adrenal gland, *Pfiffner and North*, 781
Dolphin: Milk, *Eichelberger, Fetcher, Geiling, and Vos*, 171

E

Elaidic acid: Organ uptake, *Sinclair*, 89
Testis phospholipids, absence, *Sinclair*, 89
Electrolyte(s): Blood, equilibrium, adrenal insufficiency, *Muntwyler, Mellors, and Mautz*, 345
Extracellular, liver, depletion effect, *Yannet and Darrow*, 721
—, muscle, skeletal and heart, depletion effect, *Yannet and Darrow*, 721
Muscle, skeletal, and blood, exchange, adrenal insufficiency, *Muntwyler, Mellors, Mautz, and Mangun*, 367
Tendon and blood, exchange, *Muntwyler, Mellors, Mautz, and Mangun*, 389
Tissue, equilibrium, *Muntwyler, Mellors, and Mautz*, 345
Muntwyler, Mellors, Mautz, and Mangun, 367, 389
Elimination maximum: Chemical constitution influence, *Gray and Cawley*, 397
Enamel: Fluoride adsorption, radioactive isotope in study, *Volker, Hodge, Wilson, and Van Voorhis*, 543
Endocrine(s): Lipid metabolism, effect, *Entenman, Lorenz, and Chaikoff*, 495

Enzyme(s): Activation, *Richards and Hellerman*, 237
See also Arginase, Carboxypeptidase, Diastase, Esterase, Oxidase, Pepsin, Phosphatase
Erythrocyte: *See* Blood cell, red
Esterase: Tropine, properties, *Glick*, 617
Estrone: Urine, determination, colorimetric, *Talbot, Wolfe, MacLachlan, Karush, and Butler*, 319

F

Fasting: Blood lipids, effect, *Entenman, Changus, Gibbs, and Chaikoff*, 59
Fat(s): Carotene and, oxidation, carotene oxidase effect, *Sumner and Sumner*, 531
Liver, *Marble, Grafflin, and Smith*, 253
Metabolism, liver extract effect, *McHenry and Gavin*, 683
—, pancreas extract effect, *McHenry and Gavin*, 683
Synthesis, liver extract effect, *McHenry and Gavin*, 683
—, pancreas extract effect, *McHenry and Gavin*, 683
Fatty acid(s): Chemistry, *Shinowara and Brown*, 331
Synthesis, thiamine effect, *Longenecker, Gavin, and McHenry*, 693
Fluoride(s): Bone, adsorption, radioactive isotope in study, *Volker, Hodge, Wilson, and Van Voorhis*, 543
Dentin, adsorption, radioactive isotope in study, *Volker, Hodge, Wilson, and Van Voorhis*, 543
Enamel, adsorption, radioactive isotope in study, *Volker, Hodge, Wilson, and Van Voorhis*, 543
Fluoride(s)—*continued:*
Hydroxyapatite, adsorption, radioactive isotope in study, *Volker, Hodge, Wilson, and Van Voorhis*, 543
Fungus: Pathogenic, chemistry, *Peck and Hauser*, 403

G

Gelatin: Proline, *Stein and Bergmann*, 627
Glucose: Absorption, intestine mucosa phosphates, effect, *Eiler, Stockholm, and Althausen*, 283
Glutamic acid: *l*(+)-, oxidation, *Hemophilus parainfluenzae, Klein*, 43
Racemization, *Johnson*, 459
—, heat effect, *Arnow and Opsahl*, 649
Glycine: Creatine excretion, ingestion effect, *Hyde*, 95
Creatinine excretion, ingestion effect, *Hyde*, 95
Dietary, proteins, body and, interaction, *Ratner, Rittenberg, Keston, and Schoenheimer*, 665
Phosphorus, inorganic, excretion, ingestion effect, *Hyde*, 95
Glycogen: Liver, *Marble, Grafflin, and Smith*, 253
Gonadotropic extract(s): Cyanide effect, *Bischoff*, 641
Cysteine effect, *Bischoff*, 641
Growth: Casein and casein digest effect, *Mueller, Kemmerer, Cox, and Barnes*, 573
Factor. *See also* Rice factor
Iodoacetic acid effect, *Stevenson and White*, 709
Gulonic acid: 2-Keto-*l*-, antiscorbutic properties, *Ball*, 177

H

Heart: *See also* Muscle
Hemoglobin: Blood cell, red, iron, radioactive, *Miller and Hahn,* 585
Hemophilus parainfluenzae: *l*(−)-Aspartic acid oxidation, *Klein,* 43
l(+)-Glutamic acid oxidation, *Klein,* 43
Histidine: Creatine excretion, ingestion effect, *Hyde,* 95
Creatinine excretion, ingestion effect, *Hyde,* 95
Phosphorus, inorganic, excretion, ingestion effect, *Hyde,* 95
Hydrogen: Tissue, transport mechanism, *Potter,* 417
Hydroxyapatite: Fluoride adsorption, radioactive isotope in study, *Volker, Hodge, Wilson, and Van Voorhis,* 543
Hypertension: Renal, blood pressure reduction, kidney extracts, effect, *Grollman, Williams, and Harrison,* 115
Hypervitaminosis: D_2 and D_3, dietary calcium, phosphorus, and vitamin A effect, *Morgan, Shimotori, and Hendricks,* 761

I

Iminazole ring(s): Ascorbic acid effect, *in vivo, Greenblatt and Pecker,* 341
Intestine: Mucosa phosphates, glucose absorption, effect, *Eiler, Stockholm, and Althausen,* 283
Iodine: Blood, *Riggs and Man,* 193
—, determination, micro-, permanganate acid ashing method, *Riggs and Man,* 193
Iodoacetic acid: Growth effect, *Stevenson and White,* 709
Sulfur metabolism, influence, *Stevenson and White,* 709
Iron: Easily split, red blood cell hemoglobin, *Miller and Hahn,* 585
Metabolism, radioactive isotope in study, *Austoni and Greenberg,* 27
-Porphyrin compounds, marine organisms, *Ball and Meyerhof,* 483
Radioactive, iron metabolism, use in study, *Austoni and Greenberg,* 27
—, red blood cell hemoglobin, *Miller and Hahn,* 585
Tissues, *Austoni, Rabinovitch, and Greenberg,* 17
Isotope(s): *d*(+)-Leucine metabolism and inversion, study by, *Ratner, Schoenheimer, and Rittenberg,* 653

K

Keto-*l*-gulonic acid: 2-, antiscorbutic properties, *Ball,* 177
Ketone(s): Phenolic, urine, determination, colorimetric, *Talbot, Wolfe, MacLachlan, Karush, and Butler,* 319
Kidney: Creatine formation, *Borsook and Dubnoff,* 635
Extracts, blood pressure reduction, renal hypertension, effect, *Grollman, Williams, and Harrison,* 115
Phospholipid turnover, *Sinclair,* 71

L

Lecithin(s): Liver, turnover, *Sinclair,* 83
Leucine: *d*(+)-, inversion, isotopes in study, *Ratner, Schoenheimer, and Rittenberg,* 653
—, metabolism, isotopes in study, *Ratner, Schoenheimer, and Rittenberg,* 653

Leucine—*continued:*
dl-, esters, Raney catalyst, reaction, *Ovakimian, Christman, Kuna, and Levene,* 151
l-, esters, Raney catalyst, reaction, *Ovakimian, Christman, Kuna, and Levene,* 151
Lipid(s): *Blastomyces dermatiditis, Peck and Hauser,* 403
Blood, fasting and undernutrition effect, *Entenman, Changus, Gibbs, and Chaikoff,* 59
—, sex hormones, crystalline, effect, *Entenman, Lorenz, and Chaikoff,* 495
Metabolism, endocrine effect, *Entenman, Lorenz, and Chaikoff,* 495
—, nutrition state, relation, *Entenman, Changus, Gibbs, and Chaikoff,* 59
Monilia albicans, Peck and Hauser, 403
Liver: Arginase, *Richards and Hellerman,* 237
Cephalins, turnover, *Sinclair,* 83
Creatine formation, *Borsook and Dubnoff,* 635
Electrolytes, extracellular, depletion effect, *Yannet and Darrow,* 721
Extract, fat synthesis and metabolism, effect, *McHenry and Gavin,* 683
Fat, *Marble, Grafflin, and Smith,* 253
Glycogen, *Marble, Grafflin, and Smith,* 253
Lecithins, turnover, *Sinclair,* 83
Phospholipid turnover, *Sinclair,* 71
Water, *Marble, Grafflin, and Smith,* 253

M

Malonate: Triose phosphate oxidation, effect, *Potter,* 417
Manganese: Body tissue, determination, *Ray,* 677
Milk, determination, *Ray,* 677
Organic material, determination, *Ray,* 677
Marine organism(s): Iron-porphyrin compounds, *Ball and Meyerhof,* 483
Succinic dehydrogenase, *Ball and Meyerhof,* 483
Membrane(s): Cellophane, preparation, *Seymour,* 701
Metaphosphoric acid: -Protein reaction, *Briggs,* 261
Methionine: Methyl group transfer to choline and creatine, *du Vigneaud, Chandler, Cohn, and Brown,* 787
Milk: Dolphin, *Eichelberger, Fetcher, Geiling, and Vos,* 171
Manganese determination, *Ray,* 677
Mineral: Tissue, calcified, metabolism, blood phosphorus turnover, relation, radioactive phosphorus as indicator, *Manly, Hodge, and Manly,* 293
Monilia albicans: Lipids, *Peck and Hauser,* 403
Muscle: Heart, electrolytes, extracellular, depletion effect, *Yannet and Darrow,* 721
Skeletal, and blood, electrolyte and water exchange, adrenal insufficiency, *Muntwyler, Mellors, Mautz, and Mangun,* 367
—, electrolytes, extracellular, depletion effect, *Yannet and Darrow,* 721

N

Naphthol: 4-Amino-2-methyl-, sulfhydryl groups, oxidation, effect, *Bernheim and Bernheim,* 457
Nicotinic acid: Biological materials, determination, colorimetric, *Melnick and Field,* 1

Nicotinic acid—*continued:*
Pneumococcus growth factor, *Rane and Subbarow,* 455
Urine, determination, Bandier and Hald method, *Rosenblum and Jolliffe,* 137
Nucleic acid: *Streptococcus pyogenes, Sevag, Smolens, and Lackman,* 523
Nucleotide(s): Pyridine, yeast, preparation, *Klein,* 43
Nutrition: Lipid metabolism, relation, *Entenman, Changus, Gibbs, and Chaikoff,* 59
See also Undernutrition

Obituary: Cullen, Glenn Ernest, *Van Slyke,* preceding p. 467
Oxidase: *d*-Amino acid, tissue, riboflavin deficiency effect, *Axelrod, Sober, and Elvehjem,* 749
Carotene, carotene and fat oxidation, effect, *Sumner and Sumner,* 531

P

Pancreas: Extract, fat synthesis and metabolism, effect, *McHenry and Gavin,* 683
Pantothenic acid: Pneumococcus growth factor, *Rane and Subbarow,* 455
Pantothenic acid diphosphate: *Woolley,* 461
Pepsin: Salmon, crystalline, preparation and properties, *Norris and Elam,* 443
Peptidase: Carboxy-, specificity, *Hofmann and Bergmann,* 225
Permanganate: Acid ashing method, blood iodine determination, micro-, *Riggs and Man,* 193
Perosis: Choline relation, *Jukes,* 789
Phenylalanine: Blood, phenylpyruvic oligophrenia, *Jervis, Block, Bolling, and Kanze,* 105
Chemistry, *Jervis, Block, Bolling, and Kanze,* 105
Block, Jervis, Bolling, and Webb, 567
Determination, *Block, Jervis, Bolling, and Webb,* 567
Metabolism, *Jervis, Block, Bolling, and Kanze,* 105
Block, Jervis, Bolling, and Webb, 567
Spinal fluid, phenylpyruvic oligophrenia, *Jervis, Block, Bolling, and Kanze,* 105
Phenylpyruvic oligophrenia: Blood phenylalanine, *Jervis, Block, Bolling, and Kanze,* 105
Cerebrospinal fluid phenylalanine, *Jervis, Block, Bolling, and Kanze,* 105
Tissue protein amino acids, *Block, Jervis, Bolling, and Webb,* 567
Phosphatase(s): Alkaline, zinc effect, *Hove, Elvehjem, and Hart,* 425
Phosphate(s): Intestine mucosa, glucose absorption, effect, *Eiler, Stockholm, and Althausen,* 283
Phosphatide(s): Formation, *Chargaff, Olson, and Partington,* 505
Phospholipid(s): Kidney, turnover, *Sinclair,* 71
Liver, turnover, *Sinclair,* 71
Testis, elaidic acid absence, *Sinclair,* 89
Phosphoric acid: Aminoethyl-, metabolism, radioactive phosphorus isotope as indicator, *Chargaff and Keston,* 515
Phosphorus: Blood, age effect, *Anderson and Elvehjem,* 217
—, turnover, tissue, calcified, mineral metabolism relation,

Phosphorus—*continued:*
radioactive phosphorus as indicator, *Manly, Hodge, and Manly,* 293
Hypervitaminoses D_2 and D_3, ingestion effect, *Morgan, Shimotori, and Hendricks,* 761
Inorganic, excretion, glycine and histidine ingestion effect, *Hyde,* 95
Radioactive, aminoethylphosphoric acid metabolism, indicator, *Chargaff and Keston,* 515
—, blood phosphorus turnover, tissue, calcified, mineral metabolism relation, indicator for, *Manly, Hodge, and Manly,* 293
Pneumococcus: Growth, choline effect, *Rane and Subbarow,* 455
—, nicotinic acid effect, *Rane and Subbarow,* 455
—, pantothenic acid effect, *Rane and Subbarow,* 455
Porphyrin: Iron-, compounds, marine organisms, *Ball and Meyerhof,* 483
Pregnancy: Urine α-dihydrotheelin isolation, *Huffman, MacCorquodale, Thayer, Doisy, Smith, and Smith,* 591
Proline: Gelatin, *Stein and Bergmann,* 627
dl-Proline-containing mixtures, determination, *Stein and Bergmann,* 627
l-Proline-containing mixtures, determination, *Stein and Bergmann,* 627
Proteins: Amino acids, basic, determination, electrolytic, *Albanese,* 467
Blood serum, casein and casein digest effect, *Mueller, Kemmerer, Cox, and Barnes,* 573
Body, dietary glycine and, interaction, *Ratner, Rittenberg, Keston, and Schoenheimer,* 665
Proteins—*continued:*
Metabolism, *Ratner, Schoenheimer, and Rittenberg,* 653
Ratner, Rittenberg, Keston, and Schoenheimer, 665
Metaphosphoric acid, reaction, *Briggs,* 261
Seleniferous, alkaline solutions, decomposition, *Painter and Franke,* 557
Tissue, amino acids, phenylpyruvic oligophrenia, *Block, Jervis, Bolling, and Webb,* 567
Pyridine: Nucleotides, yeast, preparation, *Klein,* 43
Pyrimidine: Vitamin B_1, photochemistry and spectroscopy, *Uber and Verbrugge,* 273
Pyruvic acid: Oxidation product, phosphorylated, *Lipmann,* 463

R

Raney catalyst: *dl*-Leucine and *l*-leucine esters, reaction, *Ovakimian, Christman, Kuna, and Levene,* 151
Renal: *See* Kidney
Rhizobium: Metabolism, *Hoover and Allison,* 181
Riboflavin: Tissue *d*-amino acid oxidase, effect, *Axelrod, Sober, and Elvehjem,* 749
Rice factor: Carbohydrate complex, *Almquist, Mecchi, Stokstad, and Manning,* 465
Identification, *Almquist, Stokstad, Mecchi, and Manning,* 213
Almquist, Mecchi, Stokstad, and Manning, 465

S

Salmon: Pepsin, crystalline, preparation and properties, *Norris and Elam,* 443
Scurvy: 2-Keto-*l*-gulonic acid, effect, *Ball,* 177

Selenium: Proteins containing, alkaline solutions, decomposition, *Painter and Franke*, 557
Serine: Synthesis, *Wood and du Vigneaud*, 413
Sex hormone(s): Crystalline, blood lipids, effect, *Entenman, Lorenz, and Chaikoff*, 495
Sorbitol: *d*-, metabolism, *Blatherwick, Bradshaw, Ewing, Larson, and Sawyer*, 549
Streptococcus pyogenes: Nucleic acid, *Sevag, Smolens, and Lackman*, 523
Succinic dehydrogenase: Marine organisms, *Ball and Meyerhof*, 483
Sucrose: Dextran synthesis and chemical constitution, *Betacoccus arabinosaceus, Hassid and Barker*, 163
Sulfhydryl group(s): Oxidation, 4-amino-2-methylnaphthol effect, *Bernheim and Bernheim*, 457
Sulfone: Dimethyl, adrenals, *Pfiffner and North*, 781
Sulfur: Metabolism, iodoacetic acid influence, *Stevenson and White*, 709

T

Tendon: Electrolyte and water exchange, *Muntwyler, Mellors, Mautz, and Mangun*, 389
Testis: Phospholipids, elaidic acid absence, *Sinclair*, 89
Theelin: α-Dihydro-, urine, pregnancy, isolation, *Huffman, MacCorquodale, Thayer, Doisy, Smith, and Smith*, 591
Thiamine: Citric acid metabolism, relation, *Sober, Lipton, and Elvehjem*, 605
Fatty acid synthesis, effect, *Longenecker, Gavin, and McHenry*, 693
Tissue(s): Calcified, mineral metabolism, blood phosphorus turnover, relation, radioactive phosphorus as indicator, *Manly, Hodge, and Manly*, 293
Electrolyte equilibrium, *Muntwyler, Mellors, and Mautz*, 345 *Muntwyler, Mellors, Mautz, and Mangun*, 367, 389
Triose phosphate: Oxidation, malonate effect, *Potter*, 417
Tropine: Esterase, properties, *Glick*, 617

U

Undernutrition: Blood lipids, effect, *Entenman, Changus, Gibbs, and Chaikoff*, 59
Urine: Estrone determination, colorimetric, *Talbot, Wolfe, MacLachlan, Karush, and Butler*, 319
Ketones, phenolic, determination, colorimetric, *Talbot, Wolfe, MacLachlan, Karush, and Butler*, 319
Nicotinic acid determination, Bandier and Hald method, *Rosenblum and Jolliffe*, 137
Pregnancy, dihydrotheelin isolation, *Huffman, MacCorquodale, Thayer, Doisy, Smith, and Smith*, 591
Uronic acid(s): Determination, micro-, *Kapp*, 143

V

Veratrine: Alkaloids, *Craig and Jacobs*, 123
Vitamin(s): A, hypervitaminoses D_2 and D_3, ingestion effect, *Morgan, Shimotori, and Hendricks*, 761
A_2, chemical constitution, *Gray and Cawley*, 397
B_1, pyrimidine, photochemistry and spectroscopy, *Uber and Verbrugge*, 273

Vitamin(s)—*continued:*
B_2. *See also* Riboflavin
E, oxidation, *Golumbic and Mattill,* 535
K, water-soluble, absorption, *Smith and Owen,* 783
See also Hypervitaminosis

W

Water: Blood, equilibrium, adrenal insufficiency, *Muntwyler, Mellors, and Mautz,* 345
Liver, *Marble, Grafflin, and Smith,* 253
Muscle, skeletal, and blood, exchange, adrenal insufficiency, *Muntwyler, Mellors, Mautz, and Mangun,* 367
Water—*continued:*
Tendon and blood, exchange, *Muntwyler, Mellors, Mautz, and Mangun,* 389
Tissue, equilibrium, *Muntwyler, Mellors, and Mautz,* 345
Muntwyler, Mellors, Mautz, and Mangun, 367, 389

Y

Yeast: Pyridine nucleotide preparation, *Klein,* 43

Z

Zinc: Phosphatases, alkaline, effect, *Hove, Elvehjem, and Hart,* 425
